A - League Notes:

The points modifications below ensures that each team has the opportunity to earn the same number of point during the season, and is necessary due to the uneven number of teams. (Each team will play 4 div. and 3 non-div. games).

* Two (2) points are earned for each game won within the division; One (1) point is earned for each non-division win.

** The final division games for the Packers on 10/14, and the Jaguars on 10/15, will count as non-division games for them only (1 pt if they win), but will be regular division games for their opponents (2 pts for a win).

*** Since the Cowboys are scheduled to play 1 additional game, their final division game on 10/15 will not count for them, and will be a non-division game for the Redskins (1pt if they win).

Playoff victories not included in stats.
